

MADISON

Internal Strategy

Lyzr Enterprise Agentic OS for BFSI

• Internal Leadership Strategy Proposal

Target Markets: US, CA, UK & EU (\$10B-\$50B+ AUM)

Powered by Lyzr Enterprise Stack

Product Strategy & Executive Architecture: **Madison**

An Enterprise Agentic Operating System built natively on the **Lyzr Enterprise Stack** (`Lyzr ADK`, `Automata`, `Cognis`, `RAI`, `Governor`, `Agent Studio`). Transforming slow, document-heavy banking workflows into autonomous, zero-hallucination, human-governed execution pipelines.

CORE OPERATING MOTTO

"A Sovereign Agentic Operating System for Enterprise Banking"

1. Executive Summary & Vision

EXECUTIVE OVERVIEW

Madison is an Enterprise Agentic Operating System built natively on the Lyzr Enterprise Stack. It transforms slow, document-heavy banking operations into autonomous, zero-hallucination, human-governed workflows—starting with high-value Commercial Lending and expanding horizontally into Commercial Sales, Marketing Compliance, Retail Ops, and AML/KYC across US, Canadian, and European banks (\$10B–\$50B+ AUM).

STRATEGIC VISION

To establish **Madison** as the premier enterprise agentic product suite for banking—leveraging **Lyzr’s full-stack AI infrastructure** to automate high-friction financial workflows with 100% auditability, bank-grade PII isolation, and zero-hallucination PDF coordinate grounding.

2. Grounded Architecture: Powered by Lyzr Enterprise Stack

Agentic Harness Loop Paradigm mapped 1-to-1 to official Lyzr primitives

MADISON AGENTIC HARNESS ARCHITECTURE

Single-Tenant Bank Private VPC

BANK CLIENT & OFFICER INTERACTION HANDSHAKE (HUMAN-IN-THE-LOOP)

- Bank Officer / Credit Analyst Interface & Co-Pilot Action Cards ('[Approve]', '[Edit]', '[Reject]')

- Grounded PDF Viewer & Highlighted Bounding Boxes ('x, y, w, h')

▲ User Request & Human Approval Flow ▼

TEMPLATIZED BFSI APPLICATION MODULES

Commercial Lending
Title Exceptions, DSCR
Spreading, Court Scout

Commercial Sales & RM
Pre-Meeting Dossiers,
Deal Structuring

Risk, AML & Retail Ops
UBO Tracing, SAR
Narratives, Garnishments

▲ Executes Agentic Workflows ▼

LYZR GOVERNOR & PRIVATE VPC HARNESS (AGENTIC LOOP CORE)

Fed SR 11-7 MRM Audit
Ledger

1. MODEL (THE BRAIN)

- Lyzr ADK `Agent()` personas
- Multi-LLM Router (Claude 3.5 Sonnet / GPT-4o / Bedrock)
- `Task()` operational graph nodes

2. ACTION → TOOLS / SANDBOX

- Lyzr Superflow Node Approvals (`running-and-approvals`)
- E2B Code Execution Sandbox
- Core Mainframe APIs (Fiserv, FIS, Jack Henry, FSC)

4. OBSERVATION → GROUNDING & RAI

- PDF Bounding-Box Overlay (`x, y, w, h` coordinates)
- Lyzr RAI Edge PII Redaction (`create\_policy` SSN/Tax ID)
- `zod` / Pydantic schema enforcers

3. RESULT → CONTEXT & MEMORY

- Lyzr ADK `KnowledgeBase()` Hybrid Vector RAG
- Lyzr `Cognis` Memory Engine (`add/search-memories`)
- Multi-day long-running state machine

3. Core Product Differentiators Grounded in Lyzr

Mapping native Lyzr enterprise primitives directly to high-value banking differentiators

Lyzr KB + Structured

Diff #1

Grounded PDF Bounding-Box Citation Ledger

Visual coordinate links on PDFs (``x, y, w, h``). Clicking any assertion (e.g. *"Unpaid Tax Lien \$12k"*) draws a highlighted bounding box directly over the exact line item on the source document (0% hallucination risk).

Lyzr Superflow Node

Diff #2

"Approve-Before-Act" Co-Pilot Action Cards

AI agents pause at high-stakes decision gates via Superflow Node Approvals (``running-and-approvals``), surfacing interactive action cards with ``[Approve]``, ``[Edit]``, and ``[Reject]`` controls for human bank officers.

Lyzr Governor

Diff #3

Native Fed SR 11-7 Model Governance Ledger

Maintains an immutable execution audit log (``Execution ID``, ``Prompt Version``, ``Context Hash``, ``Tool Parameters``, ``Guardrail Flags``, ``Human Sign-Off ID``) to pass Federal Reserve Model Validation Group (MVG) audits out-of-the-box.

Lyzr Responsible AI

Diff #4

Edge PII/NPI Isolation & Data Privacy Shield

Uses Lyzr RAI policies (``create_policy``) to scrub SSNs, Tax IDs, and account numbers at the local boundary before LLM inference (GLBA & OCC Bulletin 2023-17 compliant).

Lyzr Agent Studio

Diff #5

Git-for-Agents Enterprise Promotion Pipeline

Enables strict Dev → Staging → Production Private VPC promotion pipelines with version rollback for bank Forward-Deployed Engineers.

Lyzr Simulation Engine

Diff #6

Pre-Deployment Banking Scenario Sandbox

Pre-tests multi-agent banking workflows against thousands of synthetic stress-test scenarios before live client VPC deployment.

4. The 6 BFSI Opportunity Pillars (Taxonomy)

Exhaustive opportunity matrix covering core banking verticals across US, CA, UK & EU

PILLAR	FOCUS AREA	HIGH-ROI LYZR AI AGENT MODULES
1. Lending & Credit	CRE, SME & Corporate Debt	Title Vetting Agent (Schedule B exceptions); Financial Spreading Agent (DSCR $\geq$ 1.25x); Court Scout Agent (PACER/foreclosures); Contract Reconciliation Agent .
2. Commercial Sales & RM	RM Productivity & Deal Origination	RM Pre-Meeting Dossier Agent (SEC 10-K & news synthesis); Commercial Deal Structuring Co-Pilot ; Cross-Sell / Next-Best-Action Agent .
3. Marketing & Growth	Acquisition & Compliance	Ad Regulatory Compliance Agent (auditing ad copy against TILA, RESPA, CFPB, FCA rules); Hyper-Personalized Campaign Copy Agent .
4. Retail Operations	Branch & Customer Servicing	Garnishment & Levy Execution Agent (court attachments & exempt cash calculation); Deceased Account Probate Agent ; Dispute Resolution Agent .
5. Risk & AML/KYC	Financial Crime & GRC	UBO Tracing Agent (unwrapping offshore shell webs to $\geq$ 10% owners); SAR Narrative Writer Agent (FinCEN/FINTRAC reports); Vendor TPRM Audit Agent .
6. Wealth & Treasury	Private Banking & Hedging	ISDA & CSA Master Agreement Auditor ; Daily Margin Call Agent ; Wealth Estate Planning Co-Pilot .

5. Go-To-Market (GTM) Enterprise Sales & Delivery Engine

5-channel sales & co-sell engine designed for rapid enterprise acquisition & 7-day client onboarding

Motion #1

Via Banking & Legal Service Partners

Partner with banking law firms (e.g. Mayer Brown, Latham & Watkins), compliance consultancies, and auditing boutiques. Partners pitch and co-sell Madison directly to existing bank clients.

Motion #2

Via System Integrators (SIs)

Partner with Accenture Financial Services, Capgemini Banking, PwC, EY, and Infosys. SIs manage custom legacy core mainframe API integrations while Lyzr licenses Madison software.

Motion #3

Via Hyperscaler Cloud Co-Sell

Co-sell with AWS Financial Services, Azure for Financial Services, and GCP Banking. Listing on Cloud Marketplaces lets bank CIOs draw from pre-committed cloud budgets (AWS EDP / Azure MACC), shortening sales from 9 months to 3 weeks.

Motion #4

Direct Outbound ABM

High-touch C-suite outreach targeting Chief Credit Officers (CCOs), Chief Risk Officers (CROs), and General Counsels at \$10B-\$50B AUM regional banks with tailored benchmark reports.

Motion #5

Marketing Inbound Thought Leadership

Executive whitepapers, bank ROI calculators, SR 11-7 Model Risk Management compliance guides, and interactive web showcase demos driving inbound C-suite meeting requests.

Rapid Delivery

7-Day FDE Client Onboarding

Forward-Deployed Engineers (FDEs) use low-code configuration templates to map core mainframe APIs (Fiserv/FIS/FSC), connect client SSO (Okta), and deploy into the bank's Private VPC in under 7 days.

6. Near-Term, Mid-Term & Long-Term Execution Roadmap

Structured execution roadmap across showcase app, bank pilots, and enterprise scale

PHASE 1: NEAR-TERM

Showcase Demo & Templatization

- Build 21-day Commercial Lending Showcase App
- Develop FDE cloning scripts
- Write Sales Storyboard & Pitch Deck

PHASE 2: MID-TERM

Paid Bank Pilots & Governance

- Execute 3 Paid Bank Pilots (\$50K-\$100K PoCs)
- Audit SR 11-7 Model Validation Group compliance
- Measure baseline disbursement speed KPIs

PHASE 3: LONG-TERM

Horizontal Expansion & FDE Engine

- Launch Sales/RM & AML/UBO Skill Bundles
- Formalize FDE Client Onboarding Playbook
- Target Top 25 US Regional Banks

PHASE 4: SCALING

Global Market Expansion

- Expand to UK/EU & Canada public registries
- Package direct API connectors (Fiserv, FIS)
- Scale ARR & enterprise licensing seats

7. Open Discussions & Strategic Alignment

4 recommended strategic principles for internal leadership alignment

[RECOMMENDED] 1. Standalone Product Suite Packaging

Madison is packaged as a **configurable standalone agentic AI software suite** (the *Lyzr Banking Engine*) equipped with native banking mainframe connectors, rather than a passive template inside Lyzr Studio.

[RECOMMENDED] 2. 20% R&D / 80% FDE Resource Flywheel

Phase 1 Launch: Resource split is 20% Core R&D / 80% FDEs capturing real-world bank feedback.

Phase 2 Scale: As domain skills are templated, ratio shifts toward R&D-dominant scaling where FDEs exclusively handle low-code YAML/JSON configurations.

[RECOMMENDED] 3. Inherited SOC-2 & SR 11-7 Readiness

Lyzr natively possesses SOC-2 Type-2 and HIPAA/Enterprise Security certifications. Built natively on the Lyzr Enterprise Stack, Madison **inherits SOC-2 compliance out-of-the-box** and satisfies Fed SR 11-7 Model Validation audits on Day 1.

[RECOMMENDED] 4. System Integrator & Partner Co-Sell Motion

Active co-selling with global banking SIs (Accenture, Capgemini, PwC, EY) and banking legal/advisory partners. Partners manage legacy mainframe integration & client relationships, while Lyzr licenses the Madison agentic core.
